Variety	Fruit bearing time	Fruit description	Berry's weight	Taste	Maximum sugar content in		Qualities	Average crop (kg/bush)	Average crop (t/ha)	Bush's height x width (cm)	Bush description	Fruit dropping	Harvesting	Pollinators	Licence
					Poland, 3-23 June 2014	Siberia on 15 July 2014									
Aurora	June	oval and elongated	1.9 g (max 2.1 g)	sweet	-	-	productive, good for commercial plantations; extremely good pollinator	5 (max 6)	16.5 (max 19.8)	180 x 120	thick and compact with erect habit	do not drop off (easy to harvest)	mechanical and manual	Indigo Gem, Tundra, Borealis, Honeybee	University of Saskatchewan
Bakczarskaja Jubilejnaja (Bakcharskaya Yubileynaya)	July	elongated and oval, of the same size, juicy, refreshing, slightly fragrant; gathered in thick, extremely abundant bunches; good for harvesting	1.4 g (max 2.1 g)	slightly tart	17°Bx	14°Bx	dessert fruits good for deep freezing; rather transport tolerant	3.5 (max 5)	11.5 (max 16.5)	150 x 120	average grower, branches relatively well, yields fruits already as a young plant	do not drop off but are easy to harvest	mechanical and manual	Docz Velikana, Strezhevchanka, Vostorg, Bakcharski Velikan	FGUP „Bakczarskoje” Rosselhozakademii
Bakczarskij Velikan (Bakcharsky Giant)	June	elongated and oval, slightly asymmetric, their skin is of average thickness and royal blue in hue with a strong waxy bloom; soft, leave a dry stem scar	1.8 g (max 2.5 g)	sweet and tart, dessert	18°Bx	17°Bx	transport tolerant; yields dessert fruits which are also good for deep freezing	2.5 (max 4.5)	8.3 (max 14.9)	190 x 130	average grower with wide-stretching, rather loose habit, develops straight and thick skeletal branches	rather do not drop off	mechanical and manual	Jugana, Docz Velikana, Strezhevchanka, Vostorg	FGUP „Bakczarskoje” Rosselhozakademii
Borealis	June	oval (box-like), hidden under leaves, stick strongly to their stems	1.6 g	extremely sweet, excellent	15°Bx	-	good for home gardens and small commercial plantations; bears dessert fruits	4 (max 4.5)	13.2 (max 14.9)	140 x 120	develops wide-stretching but thickening habit	do not drop off	only manual	Aurora, Honeybee	University of Saskatchewan
Czulymkaja	June	broadly spindle-shaped, smooth with a strong waxy bloom, juicy and hard	1.2 g (max 1.6 g)	slightly tart	17°Bx	16°Bx	dessert fruits, transport tolerant and good for deep freezing	3.1 (max 6)	10.2 (max 19.8)	140 x 120	average grower, develops ball-shaped, relatively thick habit, annual shoots straight with drooping ends	do not drop off	recommended manual, mechanical also possible	Docz Velikana, Strezhevchanka, Vostorg, Bakcharski Velikan	FGUP „Bakczarskoje” Rosselhozakademii
Docz' Velikana (Giant's Daughter)	July	elongated and pear-shaped, flattened, dark violet in hue but due to a thick waxy bloom seem to be blue	1.8 g (max 2.5 g)	sweet and dessert	-	16°Bx	dessert fruits, rather transport tolerant and good for deep freezing	3.1 (max 5.2)	10.2 (max 17.2)	180 x 130	annual shoots straight with slightly drooping tops	do not drop off but are easy to harvest	mechanical and manual	Strezhevchanka, Vostorg, Bakcharski Velikan	FGUP „Bakczarskoje” Rosselhozakademii
Gordost' Bakczara (Gordost' Bakchara)	July	elongated and spindle-shaped, violet blue in hue with a strong waxy bloom, boast rather thick skin, leave a dry stem scar	1.3 g	sweet and tart, dessert	17°Bx	15.5°Bx	dessert fruits, transport tolerant and good for deep freezing	3.2	10.5	160 x 120	develops thick skeletal branches, young shoots sag under the weight of fruits	drop off	mechanical and manual (recommended at two times)	Docz Velikana, Strezhevchanka, Vostorg, Bakcharski Velikan	FGUP „Bakczarskoje” Rosselhozakademii
Honeybee	June	cylindrical, juicy and tasty, stick strongly to their stems, remain on the bush until they get dry	1.9 g	slightly tart, dessert	-	-	productive, good for commercial plantations; extremely good pollinator	4 (max 5)	13.2 (max 16.5)	150 x 120	vigorous grower	do not drop off	mechanical and manual	Indigo Gem, Tundra, Aurora, Borealis	University of Saskatchewan
Indigo Gem	June	oval, hard with slightly chewy flesh	1.3 g	sweet and dessert	17°Bx	-	good for processing, one of the best varieties to enjoy raw, ideal for commercial plantations	4 (max 5)	13.2 (max 16.5)	150 x 120	erect, V-shaped in habit	do not drop off	mechanical and manual	Aurora, Honeybee	University of Saskatchewan
Jugana	July	jug-shaped with a blunt end, dark violet, almost black in hue with a strong waxy bloom, hard with a rather thin skin	1.4 g (max 1.8 g)	sweet and dessert	-	19°Bx	dessert fruits, transport tolerant and good for deep freezing	3.5 (max 6.5)	11.5 (max 21.4)	150 x 190	bush's shape and its fruits good for harvesting	do not drop off, easy to harvest	mechanical and manual	Docz Velikana, Strezhevchanka, Vostorg, Bakcharski Velikan	FGUP „Bakczarskoje” Rosselhozakademii
Leningradski Velikan	June	cylindrical or narrowly oval, blue with a waxy bloom	1.4 g (max 2.0 g)	sweet	15°Bx	-	dessert fruits good for deep freezing	2.5 (max 5)	8.2 (max 16.5)	170 x 140	vigorous grower which thickens well	rather do not drop off at all	mechanical and manual	Morena, Nimfa, Honeybee	-
Morena	June	spindle-shaped, blue with a waxy bloom	1.7 g	sweet and tart	14°Bx	-	good for home gardens	2 (max 2.5)	6.6 (max 8.2)	150 x 120	develops ball-shaped crown; its shoots are erect	rather do not drop off	mechanical and manual	Nimfa, Leningradski Velikan, Honeybee	-
Nimfa (Nymph)	June	spindle-shaped, blue and violet in hue, covered with a waxy bloom	1.2 g	extremely sweet with distinct aroma	17°Bx	-	good for home gardens	2	6.6	150 x 120	average grower	rather do not drop off	mechanical and manual	Morena, Nimfa, Leningradski Velikan, Honeybee	-
Silginka	June	elongated, spindle-shaped, with a sharp end, covered with a waxy bloom, of the same size, juicy, firm and hard, their skin is of average thickness, delicate in over-ripe fruits	1.4 g	extremely sweet and aromatic	16°Bx	17°Bx	extremely transport tolerant	2.5 (max 3.5)	8.2 (max 11.5)	150 x 120	average grower, develops stiff, erect skeletal branches	drop off (when fully ripe)	mechanical and manual	Strezhevchanka, Vostorg, Jugana, Bakcharski Velikan, Docz Velikana	FGUP „Bakczarskoje” Rosselhozakademii
Strezhevczanka (Strezhevchanka)	June	spindle-shaped, dark in colour and slightly covered with a waxy bloom; soft when ripe, boast thin skin and leave a dry stem scar, develop at the end of sprouts (easy to harvest)	1.8 g (max 2.7 g)	slightly tart	-	13°Bx	moderately transport tolerant; of dessert quality, also good for deep freezing	2.5 (max 4.5)	8.2 (max 14.8)	180 x 150-180	vigorous grower, develops loose habit	do not drop off	mechanical and manual	Silginka, Vostorg, Jugana, Bakcharski Velikan, Docz Velikana	FGUP „Bakczarskoje” Rosselhozakademii
Tomiczka (Tomichka)	June	cylindrical or narrowly oval, blue with a waxy bloom	1.0 g	sweet and tart	17°Bx	-	transport tolerant; dessert fruits, also good for deep freezing	2.6	8.5	150 x 140	average grower, develops ball-shaped, relatively thick habit	rather do not drop off	mechanical and manual	Bakczarskaja, Bakczarskij Velikan, Docz' Velikana	-
Tundra	June	ball-shaped and oval, elongated hard and crispy	1.4 g	from sweet and tart to sweet	12°Bx	-	transport tolerant, good for deep freezing, baking and enjoying raw	4 (max 4.5)	13.2 (max 14.9)	130 x 120	thickens well	rather do not drop off	mechanical and manual	Aurora, Honeybee	University of Saskatchewan
Vostorg	June	broadly spindle-shaped, blue violet in hue, covered with a strong waxy bloom, easily come off the stem and leave a dry scar; come into ripening early and at the same time; boast thick skin and develop hard flesh	1.6 g (max 2.8 g)	sweet with tart accent; harmonious	-	17°Bx	extremely good for transport; dessert fruits, also good for deep freezing	2.5 (max 5.5)	8.2 (max 18.5)	180 x 180	vigorous grower with loose, openwork habit	drop off moderately, good for harvesting due to easy access to them	mechanical and manual	Silginka, Strezhevchanka, Jugana, Bakcharski Velikan, Docz Velikana	FGUP „Bakczarskoje” Rosselhozakademii
Wojtek	June	oval and elongated, boast rather thick skin, juicy, fruits ripen at the same time	1.0 g	sweet and tart with distinct aroma	14°Bx (tested by the producer - first half of June)	-	extremely good for transport; dessert fruits, also good for deep freezing	3 (max 5)	9.9 (max 16.5)	170 x 150	vigorous grower which thickens well; develops ball-shaped crown	rather do not drop off	mechanical and manual	Zojka	-
Zojka	June	ball-shaped, juicy, fruits ripen at the same time.	-	sweet	16-18°Bx (tested by the producer - first half of June)	-	moderately transport tolerant; of dessert quality, also good for deep freezing	3.5	11.5	160 x 135	average grower with wide-stretching, rather loose habit; develops ball-shaped crown	do not drop off	mechanical and manual	Wojtek	-
